Re: Metro Disposal Services
Smith Street & Crows Mill Road
Keasbey, New Jersey
EPA I.D. No. NJD075130815

Dear Mr. Davila:

We represent State Carting Service, Inc., which is a tenant on the subject property. We have been advised by Dennis Foerter of Weston that the EPA has requested that he obtain certain samples at various locations on the property, and we have advised him that State Carting cannot authorize access to the site for this purpose.

We understand that the subject property is included on the CERCLA Information System under the name Metro Disposal Services, that on February 7, 1983 the NUS Corporation performed a site assessment of the property to determine whether any hazardous substances had been released or discharged, and that the NUS Corporation in a report dated April 22, 1983 recommended that no further action be taken.

240405

Mr. Juan Davila

-2-

February 8, 1993

On November 13, 1992 we requested on behalf of State Carting, pursuant to the Freedom of Information Act, copies of all documents in the EPA's possession which might substantiate the EPA's request. After reviewing the documents provided by the EPA, and after a site inspection by Mr. Foerter on January 21, 1993, State Carting is not aware of any basis for granting site access to the EPA to take samples. In addition, we have ascertained that it could cost State Carting between \$6,000 to \$12,000 in environmental consulting and laboratory fees to obtain and analyze split samples taken by the EPA.

Under the circumstances, we are notifying you that State Carting will not grant access to the EPA and Weston to collect the subject samples, and we trust that the EPA will not pursue the matter further. If you have other information of which we have not been made aware bearing on this matter, please provide it to us at this time.

Very truly yours

David R. Simon
